Implementation and Getting Started

Complete the Vendor Fact Sheet

Contact UCCnet Customer Service to coordinate the following:

- Start date
- Process
- GLN
- Environment

Publish a limited number of GTIN[®]s as an initial load.

Wegmans will provide you feedback on the initial results of your publication.

Production

An initial load of all GTINs Wegmans currently carries must be sent to sync up the data. Wegmans will send back an authorization for all items where a match on UPC has occurred and the data has been synched. This will usually occur within a week of the initial load publication.

A reject will be sent back for all GTINs where a match did not occur. For all other GTINs, a pend transaction will be returned. Pended items mean there is something in question regarding the data. If necessary, changes or corrections should be sent for those U.P.C.s. Item changes, corrections, etc. should be published as necessary to keep data in sync.

New Items

All new items still need to be presented to the appropriate personnel for acceptance. The new item fact sheet must contain the GTIN. In addition a New Item Publication should be sent. Once the item has been accepted and has been established, an authorization message will be sent.

Additional Discretionary Data Elements:

Coupon Family Code is the only additional data element Wegmans requests. We have the capacity to accept any you wish to publish.
